Philadelphia, PA, January 20, 2017 - James M. Andriole, DO, a member of the Board of Directors of the National Board of Osteopathic Medical Examiners (NBOME), has been honored with the Archie Feinstein, DO Lifetime Achievement Award by the American Association of Osteopathic Examiners (AAOE). The award is presented to an individual who has promoted and served the osteopathic medical profession through service to the public on a state board and related activities. He received the award today from AAOE President Anna Hayden, DO, at the American Osteopathic Association's (AOA's) annual Osteopathic Medical Educators and Leaders Conference in Tampa, Florida.

A graduate of the Philadelphia College of Osteopathic Medicine, Dr. Andriole was appointed to the Florida Board of Osteopathic Medicine in 2000, and continues to serve that body as a member of its Probable Cause Panel. He is a past president of the AAOE, has served the Federation of State Medical Boards and is President/CEO of Disability Consultants USA, Inc.

Dr. Andriole was elected to the NBOME Board in 2009. He currently serves as Chair of the NBOME State Medical Board Task Force and is a member of the Test Accommodation Committee, the Finance Committee, and the COMVEX Subcommittee.

The AAOE represents osteopathic physicians who sit on state licensing and disciplinary boards, whether osteopathic or composite boards. The organization supports the distinctiveness and integrity of osteopathic medical licensure and is the unified authority in matters that affect osteopathic medical licensure and discipline.

The NBOME is the leading assessment organization for the osteopathic medical profession. NBOME's COMLEX-USA examination series is a requirement for graduation from colleges of osteopathic medicine and provides the pathway to licensure for osteopathic physicians in the United States and numerous international jurisdictions.
